The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/537,964	Applicant(s) PANUCCIO, MARIO	
	Examiner DAVID L. SORKIN	Art Unit 1797	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In independent claim 1, the phrase "a parameter *associated* with the concentration" is too vague, because what is or is not "associated" with concentration is ill defined. Claim 12 is further indefinite because "suspended solids" is a material, not a parameter.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-4, 11 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Black (US 6,758,590). Regarding claim 1, Black ('590) discloses a process for operating a water recovery plant comprising charging a storage tank (116) with water recovered from a manufacturing or construction process, determining a parameter associated with the concentration of one or more selected contaminants in the storage

Art Unit: 1797

tank (see col. 3, lines 20-22), diluting the water contaminated with solids whereby the concentration of the one or more selected contaminants in the storage tank is at or below a desire level (see col. 3, lines 22-23; col. 4, lines 13-15), and utilizing water from the storage tank in the manufacturing process (see col. 3, lines 50-52). Regarding claim 2, the manufacturing or construction process is the manufacture of ready mix concrete (see col. 1, lines 10-35). Regarding claim 3, the contaminated water recovered includes washings from equipment used in the manufacture and transport of ready mix concrete (see col. 2, lines 21-67). Regarding claim 4, the contaminated water is collected in a pit (see col. 3, lines 17-18). Regarding claim 11, the contaminated water is contaminated with inert fines or cementitious product (see col. 3, lines 7-37). Regarding claim 12, the parameter determined is specific gravity (see col. 4, lines 4-6).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 5-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Black (US 6,758,590). Black ('590) further discloses sequential tanks (116, 130). Although "pumping" is not express disclosed, pumping would have been an overwhelmingly obvious way of moving material from one tank to the other. Filter presses (126, 128) are also disclosed.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
